Hazards not otherwise classified

Processing by heating can produce vapours. Processing, e.g. by cutting, sawing or grinding, can produce particles and dust. For risks which have to be observed thereby, see section 7: Handling, section 8: Exposure controls / personal protection and section 11: Toxicology.

In case of heating: risk of burns.
 see section 11: Toxicological information

3. Composition / Information on ingredients

Chemical characterization: Thermoplastic-Polyolefine (PE / PP)

4. First aid measures

General information: For mechanical processing: dust formation.
 In case of heating: development of gas/vapor possible.

In case of inhalation: When vapors form:
 Provide fresh air. Seek medical treatment in case of troubles.

Following skin contact: Remove residues with water.
 If burned by hot product, quench immediately with cold tap water.
 Do not peel solidified product off the skin. Immediately get medical attention.

After eye contact: In the case of the formation of dust / When vapors form:
 Immediately flush eyes with plenty of flowing water for 10 to 15 minutes holding eyelids apart.
 In case of troubles or persistent symptoms, consult an ophthalmologist.

Most important symptoms/effects, acute and delayed

In case of heating: risk of burns.

Information to physician

Treat symptomatically.
