Information and Safety Signals

Information for Practitioner

INFORMATION
This brochure does not replace the detailed information on the handling and safety of your product provided in the instructions for use. Please be sure to read the 647G573 Instructions for Use (Qualified Personnel) attentively!
**Genium – Bionic Prosthetic System**

**Beep signal after bouncing up and down* in basic mode**

- 3x

![Diagram](image1)

- Bouncing recognized to switch

- 1x

- 1x

- 1s

- 2x

- 2x

- 1st MyMode activated

- 4x**

![Diagram](image2)

- Bouncing recognized to switch

- 1x

- 1x

- 1s

- 3x

- 3x

- 2nd MyMode activated

* switching by bouncing up and down has to be activated in X-Soft

** 4x bouncing up and down has to be activated in X-Soft

---

**Beep signal after bouncing up and down in MyMode**

- ≥ 3x

![Diagram](image3)

- Bouncing recognized to switch

- 1x

- 1x

- 1s

- 1x

- 1x

- Return to basic mode***

*** return to basic mode is also possible by attaching the charger

---

**Vibration signal**

- 3x

- Charging status 25%

- 5x

- Charging status 10%

- continuous

- Charging status 0% or no functionality

- 1x every 5 seconds

- Hydraulic system overheated

- 3x

- Charger attached to knee joint
Information and Safety Signals

Using the Remote Control

- **Selected MyMode activated**
- **Deep sleep mode activated**
- **Charger removed, selftest OK**
- **Charger removed; Warning**
- **Error**
- **AXON Tube Adapter disconnected**
- **Charging status 5%**
- **Critical error**

**Symbols used:**
- short beep signal
- long beep signal
- short vibration signal
- long vibration signal

**Colours used:**
- Information: no action required
- Warning: action required soon
- Error: action required immediately

**Note:** For further information see back of this brochure
