

TT and TF Solutions

Solutions that fit your practice and your patients

Log on and see your savings

Lower Limb Solutions combine high-quality options with a reduced cost to increase value and simplify the fitting process for you. Choose from TT and TF Solutions and select two components* for your patient to get the savings.

Use our step-by-step guide at professionals.ottobockus.com to save. The tool walks you through the selection process to find the components you need.

Step 1 Select either a TT or TF Solution

Step 2 For TT Solutions, first pick your foot model including size, patient weight, and footshell color. The appropriate adapter options will automatically appear onscreen. You can then walk through the different options for liners, suspension, and knee sleeve.

For TF Solutions, first select your knee and then your foot. Again, you will input patient details for the appropriate foot, and the options for adapters, liners, and suspension to complete your order.

Step 3 Add the items to your cart and complete your order to save 10% on high-quality components for your patients.

*The following requirements apply in order to be eligible for the discount: TF Solution requires the purchase of an eligible Ottobock knee and foot on the same order. TT Solution requires a foot and adapter kit purchase. Savings apply to all the products in the configurator included in that purchase.
